"This impressive, streamlined new field guide to plants of California deserts is based on The Jepson Manual and is truly a handbook to be carried in the field. It offers new introductory discussions, many new illustrations, revised user-friendly keys, updated distribution information, flowering times. . . and handsome color photos of many species. This marvelous book demonstrates that our deserts are not barren wastes but treasure houses filled with an abundance of floristic riches."—Robert Ornduff, author of Introduction to California Plant Life "This is a marvelously useful guide to the plants of California’s deserts, clearly-written and well-organized. An invaluable companion to those who delight in the unusual and beautiful plants of these scenic areas."—Peter H. Raven, Director, Missouri Botanical Garden "This much-needed volume incorporates new information about the status and range of many California desert plants. This book will facilitate access to information about our deserts, and will lead to increased respect and attention to them. We warmly welcome it."—Jake Sigg, President, California Native Plant Society

Based on the author’s previous publication The Encyclopedia of Tibetan Symbols and Motifs, this handbook contains an array of symbols and motifs, accompanied by succinct explanations. It provides treatment of the essential Tibetan religious figures, themes and motifs, both secular and religious.

Originally published in 1981, perceptual organization had been synonymous with Gestalt psychology, and Gestalt psychology had fallen into disrepute. In the heyday of Behaviorism, the few cognitive psychologists of the time pursued Gestalt phenomena. But in 1981, Cognitive Psychology was married to Information Processing. (Some would say that it was a marriage of convenience.) After the wedding, Cognitive Psychology had come to look like a theoretically wrinkled Behaviorism; very few of the mainstream topics of Cognitive Psychology made explicit contact with Gestalt phenomena. In the background, Cognition's first love – Gestalt – was pining to regain favor. The cognitive psychologists' desire for a phenomenological and intellectual interaction with Gestalt psychology did not manifest itself in their publications, but it did surface often enough at the Psychonomic Society meeting in 1976 for them to remark upon it in one of their conversations. This book, then, is the product of the editors’ curiosity about the status of ideas at the time, first proposed by Gestalt psychologists. For two days in November 1977, they held an exhilarating symposium that was attended by some 20 people, not all of whom are represented in this volume. At the end of our symposium it was agreed that they would try, in contributions to this volume, to convey the speculative and metatheoretical ground of their research in addition to the solid data and carefully wrought theories that are the figure of their research.

Presents a season-by-season guide to the identification, harvest, and preparation of more than two hundred common edible plants to be found in the wild.

Iâ€(tm)s all change for Moist von Lipwig, swindler, conman, and (naturally) head of the Royal Bank and Post Office. A steaming, clanging new invention, driven by Dick Simnel, the man with t (tm)flat cap and t (tm)sliding rule, is drawing astonished crowds - including a few particularly keen young men armed with notepads and very sensible rainwear  (tm) and suddenly i (tm)s a matter of national importance that the trains run on time. Moist does not enjoy hard work. His . . .vital input at the bank and post office consists mainly of words, which are not that heavy. Or greasy. And it certainly doesn (tm)t involve rickety bridges, runaway cheeses or a fat controller with knuckledusters. What he does enjoy is being alive, which may not be a perk of running the new railway. Because, of course, some people have OBJECTIONS, and they (tm)ll go to extremes to stop locomotion in its tracks.

The secret to happiness is to acknowledge and transform suffering, not to run away from it. In No Mud, No Lotus, Thich Nhat Hanh offers practices and inspiration transforming suffering and finding true joy. Thich Nhat Hanh acknowledges that because suffering can feel so bad, we try to run away from it or cover it up by consuming. We find something to eat or turn on the television. But unless we’re able to face our suffering, we can’t be present and available to life, and happiness will continue to elude us. Nhat Hanh shares how the practices of stopping, mindful breathing, and deep concentration can generate the energy of mindfulness within our daily lives. With that energy, we can embrace pain and calm it down, instantly bringing a measure of freedom and a clearer mind. No Mud, No Lotus introduces ways to be in touch with suffering without being overwhelmed by it. "When we know how to suffer," Nhat Hanh says, "we suffer much, much less." With his signature clarity and sense of joy, Thich Nhat Hanh helps us recognize the wonders inside us and around us that we tend to take for granted and teaches us the art of happiness.

"This will be considered the most complete flora ever written for anyplace in the U.S. They have meticulously and accurately brought the status of vascular plants in the Chicago region up-to-date, while painstakingly recording an incredible array of interactions between the flora and other organisms, especially insects. The intricate pollination of some plants, many of these associations not previously known or recorded, is almost beyond belief." - Robert H. Mohlenbrock--

This handbook will provide the student or keen amateur with a clear and reliable means of identifying those plants which grow wild in Ireland. It is a comprehensive re-working of the classic and standard Flora of Ireland; this will be the eighth edition. It has been brought fully up-to-date through incorporating the latest in botanical research and it reflects contemporary and modern approaches to plant classification based on recent advances in genetics.

An A to Z Catalog of Innovative Spices and Flavorings Designed to be a practical tool for the many diverse professionals who develop and market foods, the Handbook of Spices, Seasonings, and Flavorings combines technical information about spices—forms, varieties, properties, applications, and quality specifications — with information about trends, spice history, and the culture behind their cuisines. The book codifies the vast technical and culinary knowledge for the many professionals who develop and market foods. While many reference books on spices include alphabetized descriptions, the similarity between this book and others ends there. More than just a list of spices, this book covers each spice’s varieties, forms, and the chemical components that typify its flavor and color. The author includes a description of spice properties, both chemical and sensory, and the culinary information that will aid in product development. She also explains how each spice is used around the world, lists the popular global spice blends that contain the spice, describes each spice’s folklore and traditional medicine usage, and provides translations of each spice’s name in global languages. New to this edition is coverage of spice labeling and a chapter on commercial seasoning formulas. Going beyond the scope of most spice books, this reference describes ingredients found among the world’s cuisines that are essential in providing flavors, textures, colors, and nutritional value to foods. It explores how these ingredients are commonly used with spices to create authentic or new flavors. The author has created a complete reference book that includes traditionally popular spices and flavorings as well as those that are emerging in the US to create authentic or fusion products. Designed to help you meet the challenges and demands of today’s dynamic marketplace, this book is a complete guide to developing and marketing successful products.

"This is a follow-up volume to Gracie's Spring Wildflowers of the Northeast. This new book treats 35 species of summer blooming wildflower some common, others less so concentrating on each species life history and, in the same manner as the earlier book, providing intriguing insights into the biology, ecology, folklore, and, where relevant, ethno-botany of each flower. Each species account is richly illustrated with a range of color photos"--

THE SUNDAY TIMES BESTSELLER In A Lotus Grows in the Mud, Goldie Hawn takes us on an inspiring odyssey and, with her trademark effervescent humour, reveals the lessons she's learned and the wisdom she's gained along the way. This is Goldie's chance to talk about everything from anger and fear, to love, compassion, friendship, and the many challenges she's faced in her career. First recalling her early days as the little girl from suburbia who longed to be a ballerina but felt like an ugly duckling, Goldie then takes us on a whirlwind tour through her go-go dancing years in 1960s New York, her phenomenal success on TV's Rowan & Martin's Laugh-in, Hollywood stardom and her extraordinary experiences in films such as the Oscar-winning Cactus Flower, Swing Shift, and Private Benjamin. She also speaks about her relationship with her family - partner Kurt Russell, her children Kate Hudson, Oliver Hudson and Wyatt Russell, and her stepson Boston. Written with compassion and integrity, A Lotus Grows in the Mud is an insightful and inspiring look back at a life well lived by a woman well loved.

A Chinese peasant overcomes the forces of nature and the frailties of human nature to become a wealthy landowner.

Historically, few topics have proven to be so controversial in international intellectual property as the protection of geographical indications (GIs). The adoption of TRIPS in 1994 did not resolve disagreements, and countries worldwide continue to quarrel today as to the nature, the scope, and the enforcement of GI protection nationally and internationally. Thus far, however, there is little literature addressing GI protection from the point of view of the Asia-Pacific region, even though countries in this region have actively discussed the topic and in several instances have promoted GIs as a mechanism to foster local development and safeguard local culture. This book, edited by renowned intellectual property scholars, fills the void in the current literature and offers a variety of contributions focusing on the framework and effects of GI protection in the Asia-Pacific region. The book is available as Open Access.

The Wisdom of the Chinese Kitchen, with its 150 recipes culled from a lifetime of family meals and culinary instruction, is much more than a cookbook. It is a daughter’s tribute -- a collection of personal memories of the philosophy and superstitions behind culinary traditions that have been passed down through her Cantonese family, in which each ingredient has its own singular importance, the preparation of a meal is part of the joy of life, and the proper creation of a dish can have a favorable influence on health and good fortune. Each chapter begins with its own engaging story, offering insight into the Chinese beliefs that surround life-enhancing and spiritually calming meals. In addition, personal family photographs illustrate these stories and capture the spirit of China before the Revolution, when Young’s family lived in Canton, Shanghai, and Hong Kong. The first part, "Mastering the Fundamentals," provides instruction on the arts of steaming and stir-frying; the preparation of rice, panfried, and braised dishes; the proper selection of produce; and the fine arts of chopping and slicing. Part Two, "The Art of Celebration," concentrates on the more elaborate, complex, and meaningful dishes -- such as Shark’s Fin Soup and West Lake Duck -- that are usually made with rare ingredients, and sweets such as Water Chestnut Cake and Sesame Balls. The final part, "Achieving Yin-Yang Harmony," explores the many Chinese beliefs about the healing properties of ginseng, ginkgo nuts, soybeans, dong quai, and the many vegetable and fruit soup preparations that balance and nourish the body. The stories and recipes combine to demonstrate the range of Cantonese cooking, from rich flavors and honored combinations to an overall appreciation of health, well-being, and prosperity. In addition to the recipes, Young provides a complete glossary of dried herbs, spices, and fresh produce, accompanied by identifying photos and tips on where to purchase them. Unique traditional dishes, such as Savory Rice Tamales and Shrimp Dumplings, are also illustrated step by step, making the book easy to use. The central full-color photo section captures details of New Year’s dishes and the Chinese home decorated in celebration, reminding one that these time-honored traditions live on, and the meals and their creation are connections to the past.

Connecting deeply with our kids can be difficult in our busy, technology-driven lives. Reading aloud offers us a chance to be fully present with our children. It also increases our kids’ academic success, inspires compassion, and fortifies them with the inner strength they need to face life’s challenges. As Sarah Mackenzie has found with her own six children, reading aloud long after kids are able to read to themselves can deepen relationships in a powerful way. Founder of the immensely popular Read-Aloud Revival podcast, Sarah knows first-hand how reading can change a child’s life. In The Read-Aloud Family, she offers the inspiration and age-appropriate book lists you need to start a read-aloud movement in your own home. From a toddler’s wonder to a teenager’s resistance, Sarah details practical strategies to make reading aloud a meaningful family ritual. Reading aloud not only has the power to change a family—it has the power to change the world.

The writer employs an energetic prose style interspersed with melodic passages to make the writing itself a hybrid. Set in particular times and places, Purple Lotus nonetheless appeals to readers everywhere, especially women, to claim the full measure of their human rights. A vivid and resplendent novel for our time." —Elaine Neil Orr, critically acclaimed author of Swimming Between Worlds Tara moves to the American South three years after her arranged marriage to tech executive Sanjay. Ignored and lonely, Tara finds herself regressing back to childhood memories that have scarred her for life. When she was eight, her parents had left her behind with her aging grandparents and a schizophrenic uncle in Mangalore, while taking her baby brother with them to make a new life for the family in Dubai. Tara’s memories of abandonment and isolation mirror her present life of loneliness and escalating abuse at the hands of her husband. She accepts the help of kind-hearted American strangers to fight Sanjay, only to be pressured by her patriarchal family to make peace with her circumstances. Then, in a moment of truth, she discovers the importance of self-worth—a revelation that gives her the courage to break free, gently rebuild her life, and even risk being shunned by her community when she marries her childhood love, Cyrus Saldanha. Life with Cyrus is beautiful, until old fears come knocking. Ultimately, Tara must face these fears to save her relationship with Cyrus—and to confront the victim-shaming society she was raised within. Intimate and deeply moving, Purple Lotus is the story of one woman’s ascension from the dark depths of desolation toward the light of freedom.

Book Four in the Magnificent Dune Chronicles--the Bestselling Science Fiction Adventure of All Time Millennia have passed on Arrakis, and the once-desert planet is green with life. Leto Atreides, the son of the world’s savior, the Emperor Paul Muad'Dib, is still alive but far from human. To preserve humanity's future, he sacrificed his own by merging with a sandworm, granting him near immortality as God Emperor of Dune for the past thirty-five hundred years. Leto's rule is not a benevolent one. His transformation has made not only his appearance but his morality inhuman. A rebellion, led by Siona, a member of the Atreides family, has risen to oppose the despot's rule. But Siona is unaware that Leto’s vision of a Golden Path for humanity requires her to fulfill a destiny she never wanted--or could possibly conceive....

This volume presents the first book-length study in English of the concept of Buddha nature as discussed in the Buddha Nature Treatise (Fo Xing Lun), attributed to Vasubandhu and translated into Chinese by Paramartha in the sixth century. The author provides a detailed discussion of one of the most important concepts in East Asian Buddhism, a topic little addressed in Western studies of Buddhism until now, and places the Buddha nature concept in the context of Buddhist intellectual history. King then carefully explains the traditional Buddhist language in the text, and embeds Buddha nature in a family of concepts and values which as a group are foundational to the development of the major indigenous schools of Chinese Buddhism. In addition, she refutes the accusations that the idea of Buddha nature introduces a crypto-Aman into Buddhist thought, and that it represents a form of monism akin to the Brahmanism of the Upanisads. In doing this, King defends Buddha nature in terms of purely Buddhist philosophical principles. Finally, the author engages the Buddha nature concept in dialogue with Western philosophy by asking what it teaches us about what a human being, or person, is.

Hinduism is more than a religion; it is a way of life. Its rich and multicoloured history has made the structure of its mythical and philosophical principles into a highly differentiated maze, of which total knowledge is a practical impossibility. This volume cannot offer a complete survey of the meaning of Hinduism. It is an extensive compilation of important deities and their divine manifestations, so that modern students can understand the significance of the Hindu pantheon.

Foreword by Philippa Perry 'Based on groundbreaking research that has the power to change the lives of countless children - and the adults who love them.' – Susan Cain, New York Times bestselling author of Quiet' A necessary and important book.' - Philippa Perry, Sunday Times bestselling author of The Book You Wish Your Parents Had Read Are you a hardy and resilient dandelion, or are you a more sensitive and fragile orchid? Building on the definitions of introvert, extrovert or highly sensitive, The Orchid and the Dandelion exposes – for the first time – how a combination of environmental and genetic factors contribute to what makes us who we are. This breakthrough research explains why some people struggle where others succeed, why happiness comes so easily to some while frustrations weigh more heavily on others. In The Orchid and the Dandelion, Dr W. Thomas Boyce – one of the world’s foremost researchers in the field of pediatric health – presents findings that children have two very different responses to their environments. While some children are like dandelions and can thrive in almost any environment, there are others who, like orchids, are much more reactive and susceptible to their surroundings. Now we finally have a scientific framework to understand people and how to address their unique needs to help them find their fullest potential. This groundbreaking book draws on extensive research into genetics and the exploding field of epigenetics, examples and real stories that will re-frame how we think about orchid and dandelion children – and the adults those children have become. By understanding which of us are, genetically and environmentally speaking, the orchids of this world, Dr Boyce explains how to care for and parent our children – the true orchids. He shows how we can help them thrive by sharing insights and lessons from his thirty years of research in the field.

Provides a concise Flora for the student and amateur botanist, giving brief, but accurate and scientific descriptions of all plants commonly found in the British Isles. This third edition is expanded to include more detailed treatment of certain taxonomically difficult groups and the distribution of many species have been indicated more precisely than in earlier editions.

In an increasingly globalised world, place and provenance matter like never before. The law relating to Geographical Indications (GIs) regulates designations which signal this provenance. While Champagne, Prosciutto di Parma, Café de Colombia and Darjeeling are familiar designations, the relevant legal regimes have existed at the margins for over a century. In recent years, a critical mass of scholarship has emerged and this book celebrates its coming of age. Its objective is to facilitate an interdisciplinary conversation, by providing sure-footed guidance across contested terrain as well as enabling future avenues of enquiry to emerge. The distinctive feature of this volume is that it reflects a multi-disciplinary conversation between legal scholars, policy makers, legal practitioners, historians, geographers, sociologists, economists and anthropologists. Experienced contributors from across these domains have thematically explored: (1) the history and conceptual underpinnings of the GI as a legal category; (2) the effectiveness of international protection regimes; (3) the practical operation of domestic protection systems; and (4) long-unresolved as well as emerging critical issues. Specific topics include a detailed interrogation of the history and functions of terroir; the present state as well as future potential of international GI protection, including the Lisbon Agreement, 2015; conflicts between trade marks and GIs; the potential for GIs to contribute to rural or territorial development as well as sustain traditional or Indigenous knowledge; and the vexed question of generic use. This book is therefore intended for all those with an interest in GIs across a range of disciplinary backgrounds. Students, scholars, policy makers and practitioners will find this Handbook to be an invaluable resource.

A beloved classic—written by a beloved Caldecott winner—is lovelier than ever! Barbara Cooney’s story of Alice Rumphius, who longed to travel the world, live in a house by the sea, and do something to make the world more beautiful, has a timeless quality that resonates with each new generation. The countless lupines that bloom along the coast of Maine are the legacy of the real Miss Rumphius, the Lupine Lady, who scattered lupine seeds everywhere she went. Miss Rumphius received the American Book Award in the year of publication. To celebrate the thirtieth anniversary of two-time Caldecott winner Barbara Cooney’s best-loved book, the illustrations have been reoriginated, going back to the original art to ensure state-of-the-art reproduction of Cooney’s exquisite artwork. The art for Miss Rumphius has a permanent home in the Bowdoin College Museum of Art.

Ethics for the Information Age is appropriate for any standalone Computers and Society or Computer Ethics course offered by a computer science, business, or philosophy department, as well as special modules in any advanced CS course.
